

Progress Report

Quantifying carbon sequestration as a function of silvicultural treatment in loblolly pine

CAFS_21.89

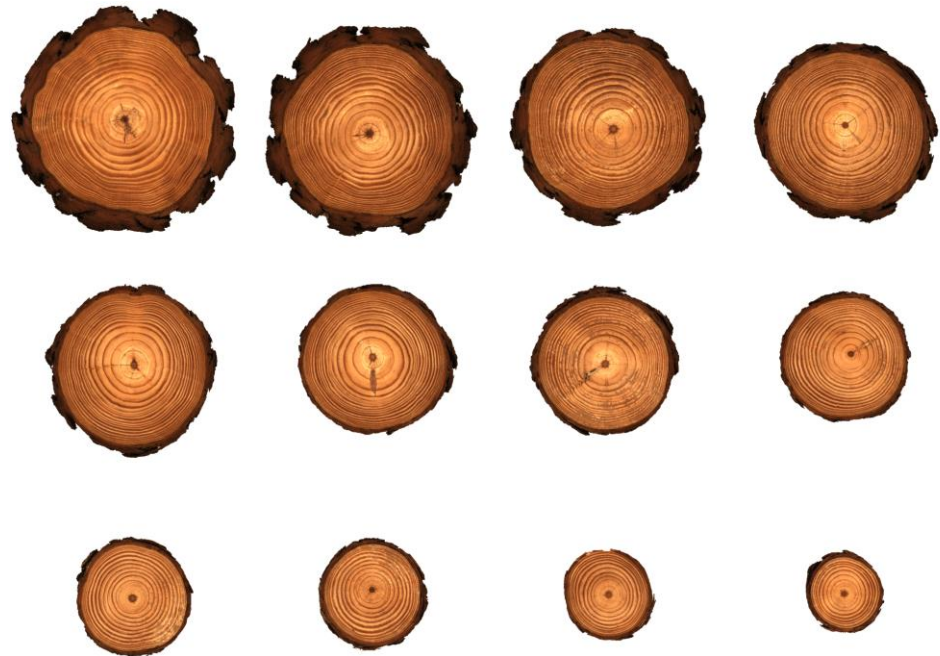

Joe Dahlen (UGA), Cristian Montes (UGA), Bronson Bullock (UGA), Dan Markewitz (UGA), Tom Eberhardt (USFS)

Joe Dahlen

Project Overview

- Growing interest in quantifying carbon in managed forests
- How does silvicultural treatment influence carbon sequestration in stems?

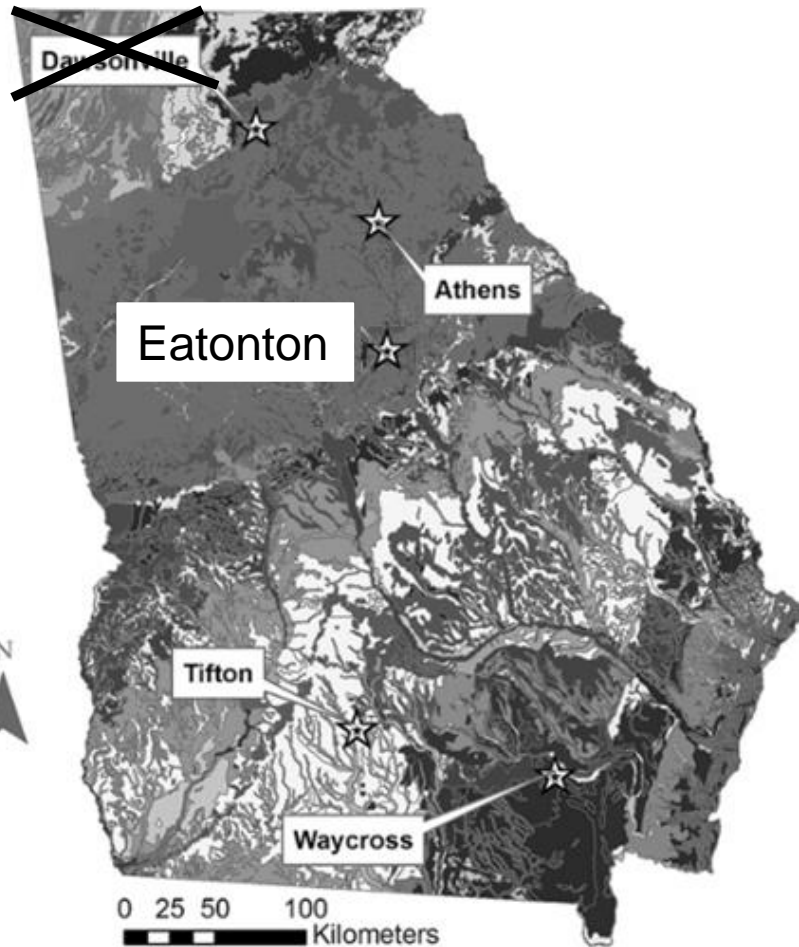

CAPPS study

Current Progress

- Control (C)
- Herbicide (H)
- Fertilizer (F)
- Herb + Fert

CAPPS Site Locations in Georgia

Dan Markewitz

USDA AFRI Grant

Leveraging PINEMAP, growing CAPPS –
Soil health in managed forests

CAPPS study will be harvested and
replanted

Working with Dan Markewitz on logistics
to sample trees

Future Plans

CAFS 2021 Fall IAB Meeting
