CAFS SUMMER 2025 IAB MEETING

JUNE 10-12

CAFS: 2010 - 2025

*BY THE NUMBERS**

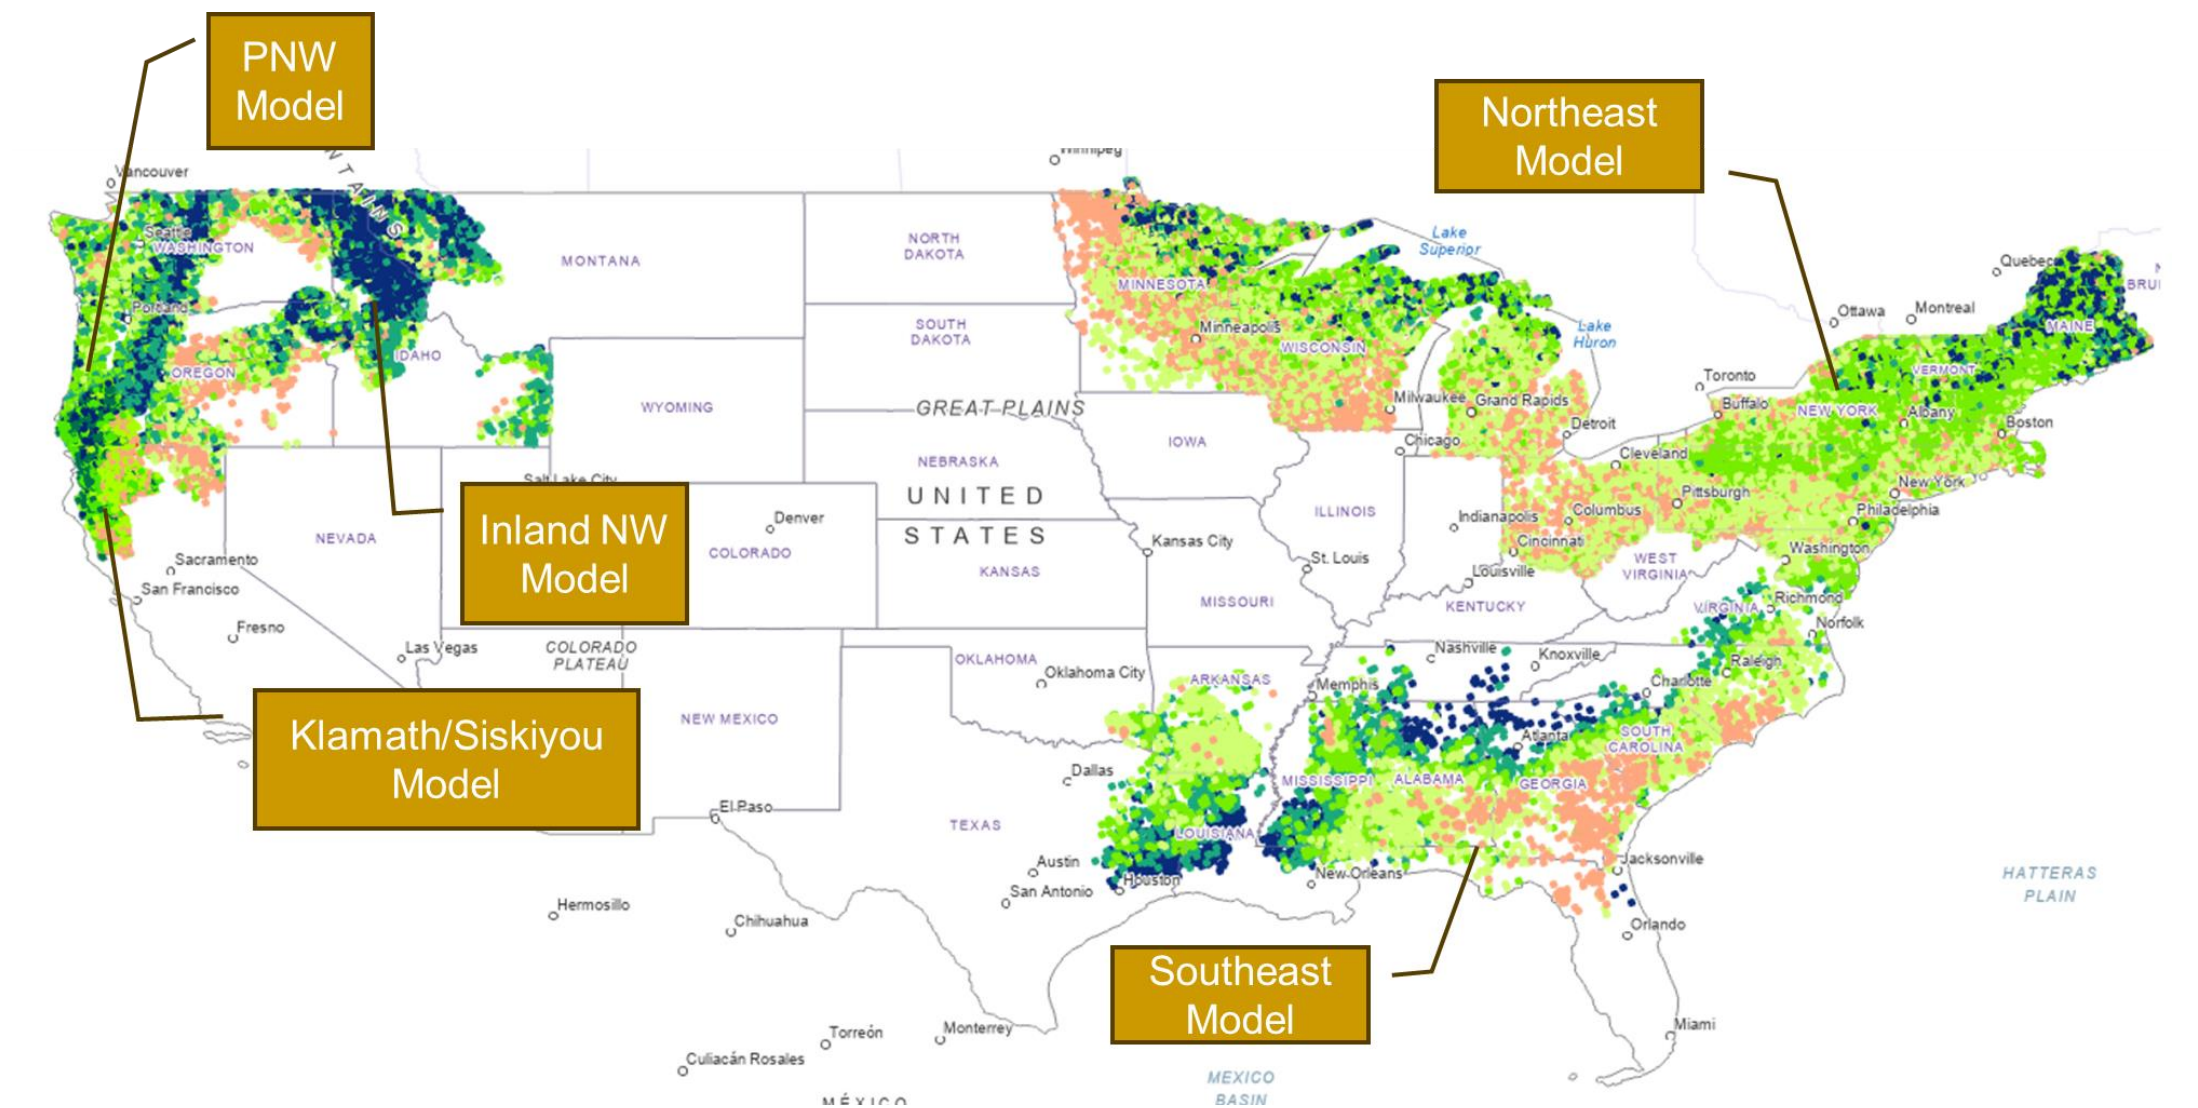

* Missing 2017/2018

CAF: 2010 - 2025

MAJOR PROJECTS LED AT THE UoFI

- Fungal Endophytes in Conifer Systems
- Systemic Insecticides
- White pine & Douglas-fir Genomics
- White pine Blister Rust Resistance
- Larch and Cedar Nutrient Dynamics
- Western Larch Intensive Management
- Drivers of Forest Regeneration Success (INTERN)
- Seedling Response to Drought Conditioning
- UAS Photogrammetry for Enhanced Forest Inventory (INTERN)
- *Accuracy Assessment of RS Sensors/Platforms for Individual Tree Identification & Measurement (INTERN)*
- *Industrial Scale Reforestation Supply Chain BMPs (INTERN)*
- *Machine Learning and Mapping of Forest Carrying Capacity across the US*
- *Site-Stand Dynamics & Pine Beetle Mortality in Pine Ecosystems*
- *Robust SAE strategies for developing accurate stand-level diameter distributions*

Italics = Ongoing projects

IFC MEMBER SUPPORT FOR CAFS

UNIVERSITY OF IDAHO PUBLIC-PRIVATE PARTNERSHIP

INDUSTRY

COUNTY

STATE

FEDERAL

COLLABORATION

ADVANCING FOREST SCIENCE

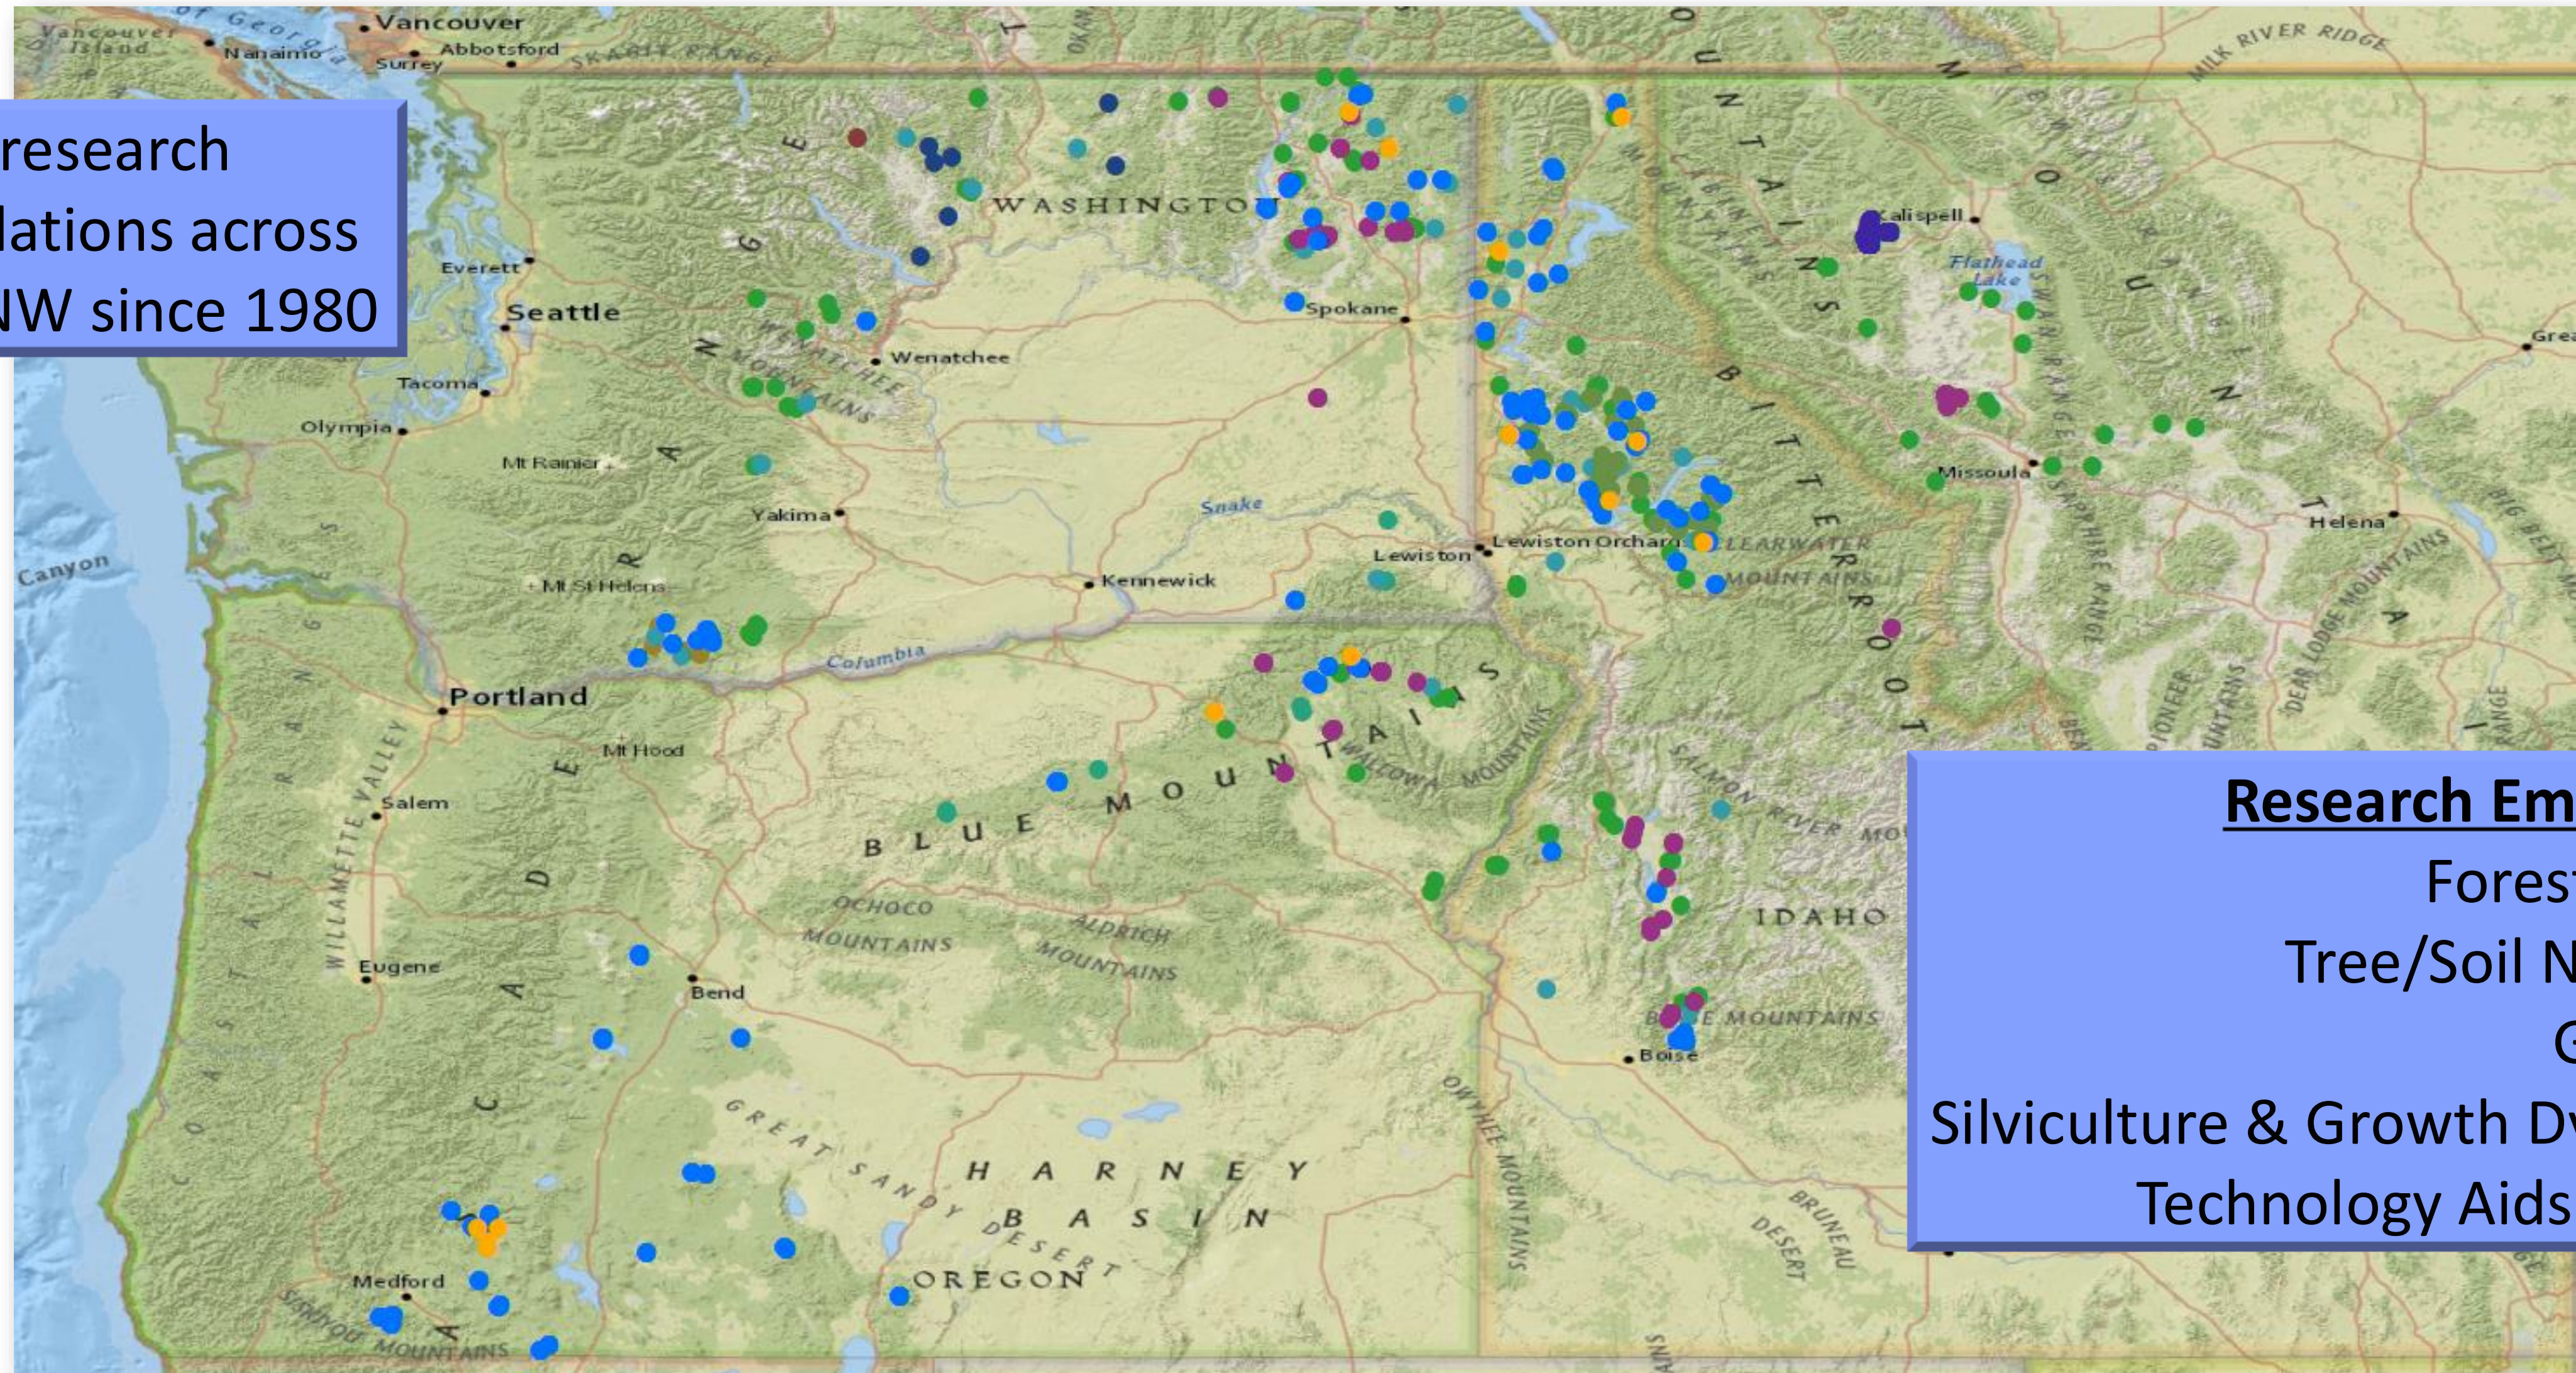

INSTALLATION NETWORK

REGIONAL OPERATIONAL RESEARCH FOR LOCAL STAND MANAGEMENT

500+ research
installations across
the INW since 1980

Research Emphases:

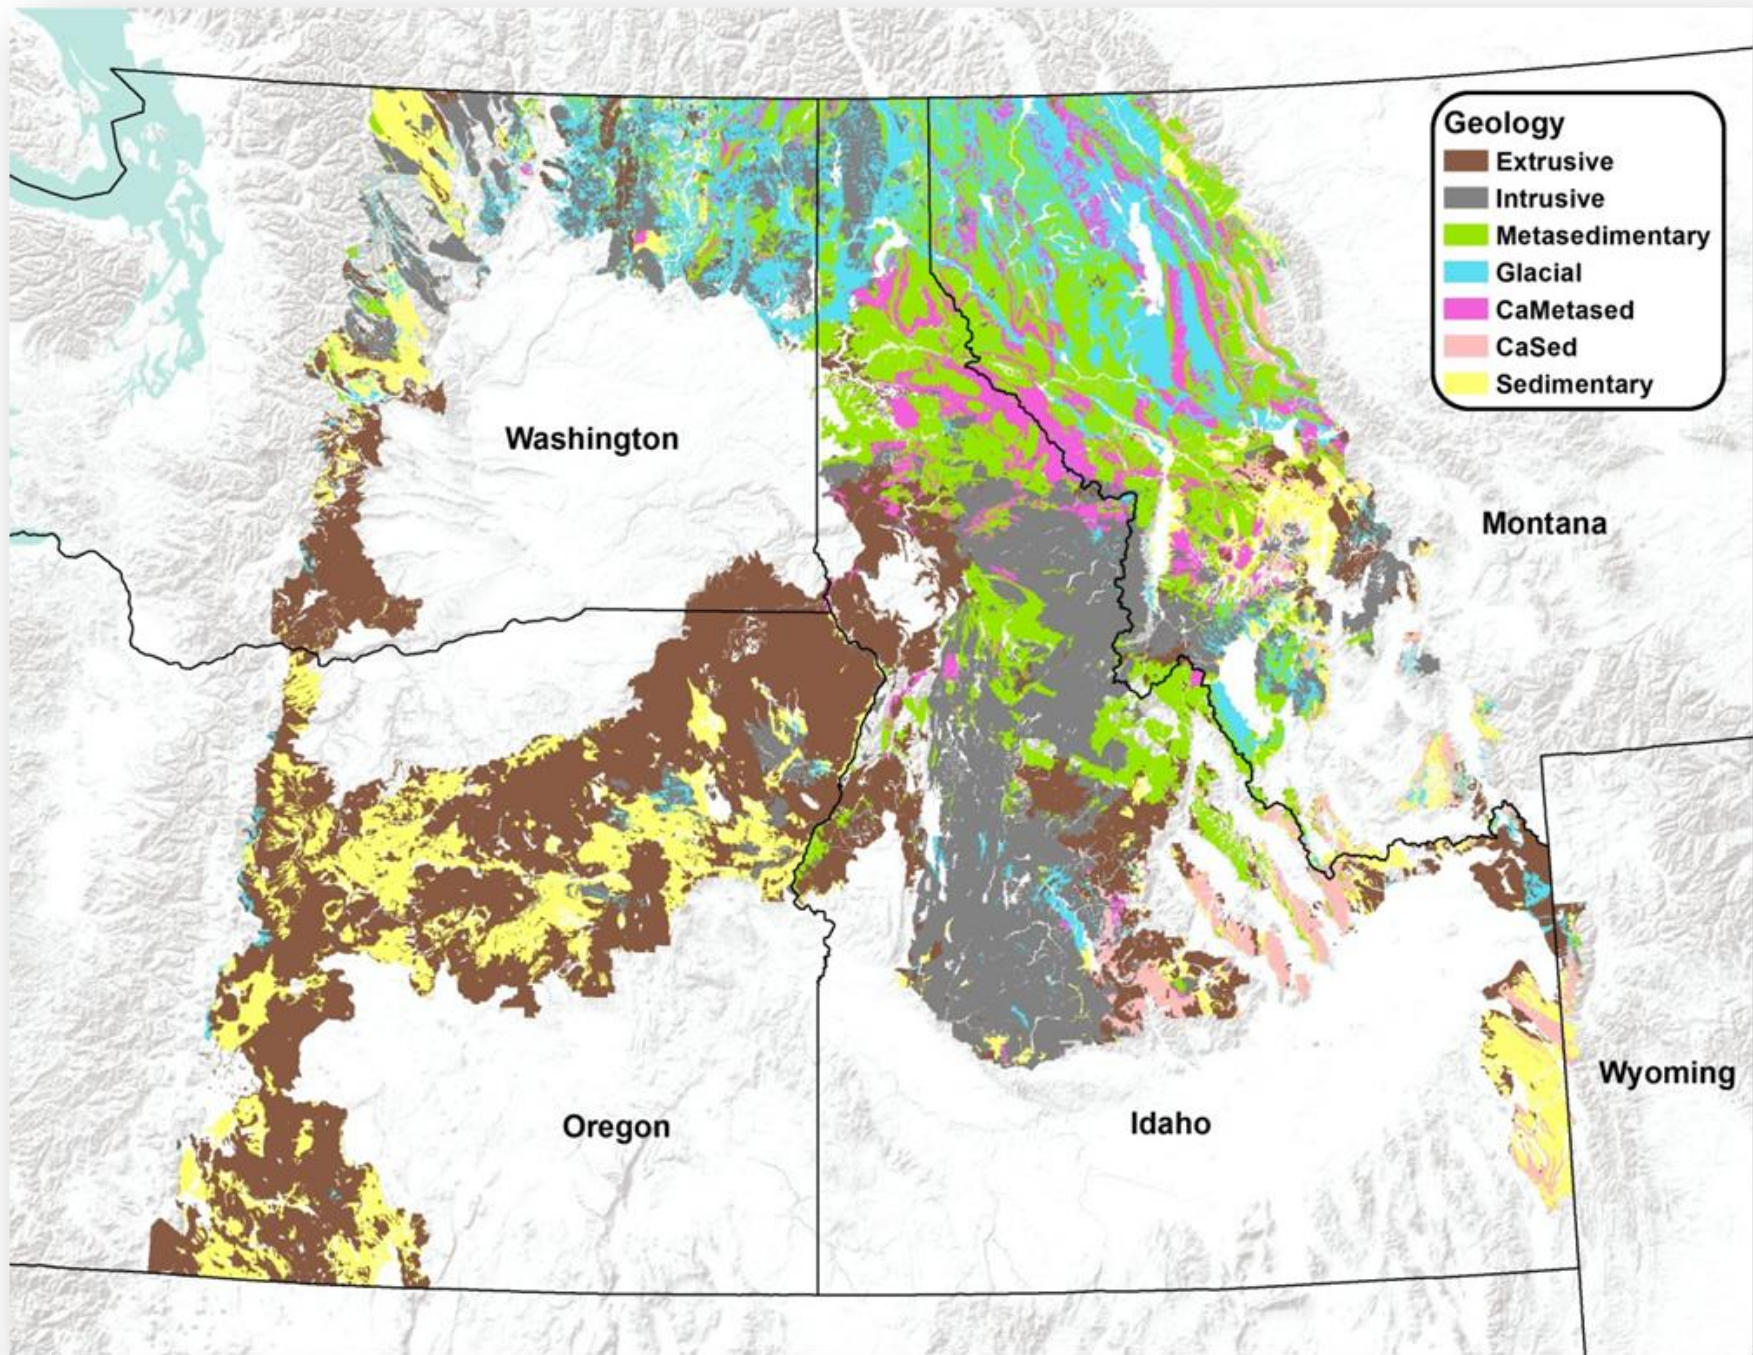

- Forest Health
- Tree/Soil Nutrition
- Genetics
- Silviculture & Growth Dynamics
- Technology Aids (LiDAR)

NUTRITION GUIDELINES – HISTORIC ROOTS

SEED ORCHARD & SILVICULTURE SUPPORT

- I Full spectrum physiochemical analysis for creating and maintaining healthy seed orchards
 - Contract with Region 1 and 6 Seed Orchard Managers to provide foliar and soil nutrition analysis
 - Fertilizer recommendations to overcome nutrient deficiencies and maintain nutrient balances for productivity and enhancing cone crop production
- I Silviculture-Nutrition Management Guidelines as a function of soil parent material

Element	Function	Source
Nitrogen (N)	Photosynthesis Biomass Production	Atmosphere
Phosphorus (P)	Metabolism	Rock
Potassium (K)	Defensive Chemicals Stomatal Control	Rock
Sulfur (S)	Photosynthesis Pest Resistance ?	Rock Atmosphere
Copper (Cu)	Photosynthesis N processing	Rock
Boron (B)	Cell wall structure Translocation of Sugars	Rock

Soil Parent Material	Soil Texture	Soil Nutrition
Basalt (BA)	Fine	High
Volcanic Ash (VA)	Fine	Medium
Schist (SH)	Medium	Medium
Granite (GR)	Coarse	Medium
Gneiss (GN)	Coarse	Medium
Metasedimentary (MS)	Variable	Low
Glacial Till (GT)	Variable	Variable

Species	Demand
Grand fir	Very High
Douglas-fir	high
White Pine	Moderate to high
Ponderosa pine	Moderate
Lodgepole pine	Low
Western larch	Low

- Nutrient Management Study
 - Installed 2008-2012
 - 10 yrs results available in summary 2-pager, manuscript in development
- Realized Genetic Gain Trials
 - Installed 2022-2025
 - 2 yr update available in summary 2-pager,
 - IFC graduate student thesis on early study findings late 2025
 - Climate Station Network available to members for INW and K-S regions
 - Precipitation, air temperature, relative humidity, vapor pressure deficit, soil moisture, soil temperature

RESEARCH INITIATIVES

PROJECT UPDATES + DELIVERABLES

I DENSITY MANAGEMENT

- Paired Plot Network
 - Initiated 2013, ongoing
 - Evaluates tree and stand response to thinning intensity as a function of site and species composition
 - Treatment response used to calibrate:
 - G&Y models
 - Validate SDImax models
 - Evaluate thinning effects on taper
- Thinning Response Calculator
 - Developing a species-site type calculator to estimate growth/mortality as a function of density manipulation across the Intermountain West
- Training plots for lidar research (SLAM, ALS, Geiger)

Project Update

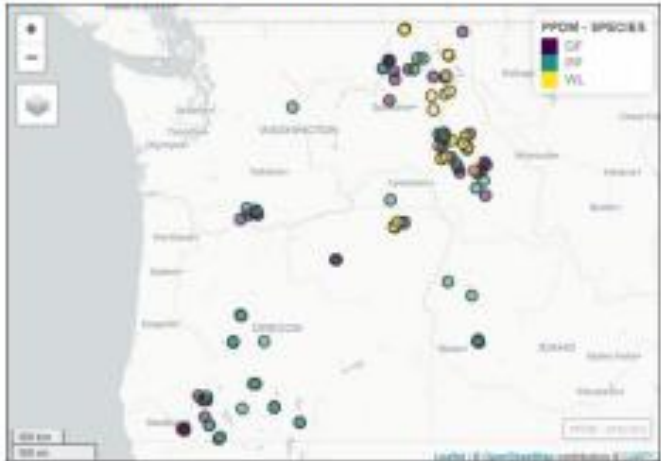

2013 - 2023

Overall PPDM Objectives:

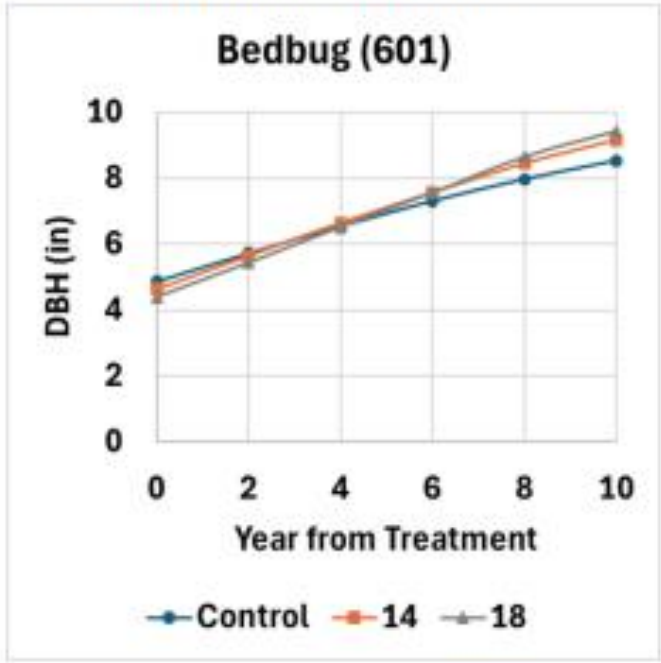

- Determine relative densities that optimize stand health and productivity across varying site growth factors
- Identify optimal stand development stage for thinning response relative to an organization's economic or ecological management objectives
- Incorporate results into growth and yield models for the improvement of small-diameter stand growth projections

Research Installation Status:

- 101 installations sited on member lands across the Inland Northwest, across DF, PP, and WL plantations
- Installations measured every 2 yrs through year 10 post-thinning. Individual tree measurements include total height, DBH, defect, mortality, and cause of mortality
- 16 sites have reached 10 yrs, 61 at 8 yrs, 91 at 6 yrs, and all have at least 4 yrs of measurements
- 4 installations have burned (Holderby (DF), Hayden Fox West, Gearhardt N & S (PP) - latter three have measurable plots)

Typical Tree Response to Thinning

Bedbug (DF) PPDM following a 14 or 18 ft spacing thin

It is the policy of the University of Idaho to prohibit and eliminate discrimination on the basis of race, color, national origin, religion, sex, sexual orientation, and gender identity/expression, age, disability, or status as a Vietnam-era veteran. This policy applies to all programs, services, and facilities, and includes, but is not limited to, applications, admissions, access to programs and services, and employment.

University of Idaho

RESEARCH INITIATIVES

PROJECT UPDATES + DELIVERABLES

I LiDAR + 3D NAIP

- Paired Plot Network
 - Evaluate the utility of using SLAM LiDAR for periodic remeasurement
 - Measure species tree taper as a function of thinning intensity, species composition, and site type
 - Leverage historic and future 3D NAIP and/or LiDAR acquisitions for building machine learning models relative to forest metrics (site index, carbon, biomass, etc.)
 - Build LiDAR-LAI models

INTERMOUNTAIN FORESTRY COOPERATIVE

SLAM LiDAR Research

Research Objectives
Utilizing Paired Plot Density Management Network
The IFC is assessing whether SLAM LiDAR is capable of

efficient and to accurately g-term?

leverage is for rapid

HOME IFC HOMEPAGE

FOREST SITE TYPE CALCULATOR

This tool generates classifications of forest site type based on precipitation, heat load and soil quality. Click on the steps below to generate a site type map of a region of interest.

STEP 1: DEFINE AOI FOR SITE TYPE CLASSIFICATION

Draw polygons on the map or upload a shapefile to define a region of interest. A button will appear - click it to request statistics over your region.

Map area: NorthWest USA ▼

☐ Upload Shapefile ([Directions](#))

☒ Draw areas on a map

STEP 2: REFINE THE FOREST SITE TYPE

Inputs: User Defined Area of Interest (>50K acres)

Outputs:

- 1) Mean Annual Precipitation
- 2) Heat Load (Radiation x DD10-40)
- 3) Available Soil Water
- 4) Depth to Restrictive Layer
- 5) **Forest Site Type**

Polygon Map

Map files are large and may take a few minutes to load. Further, map files will be deleted 15 minutes after they are rendered.

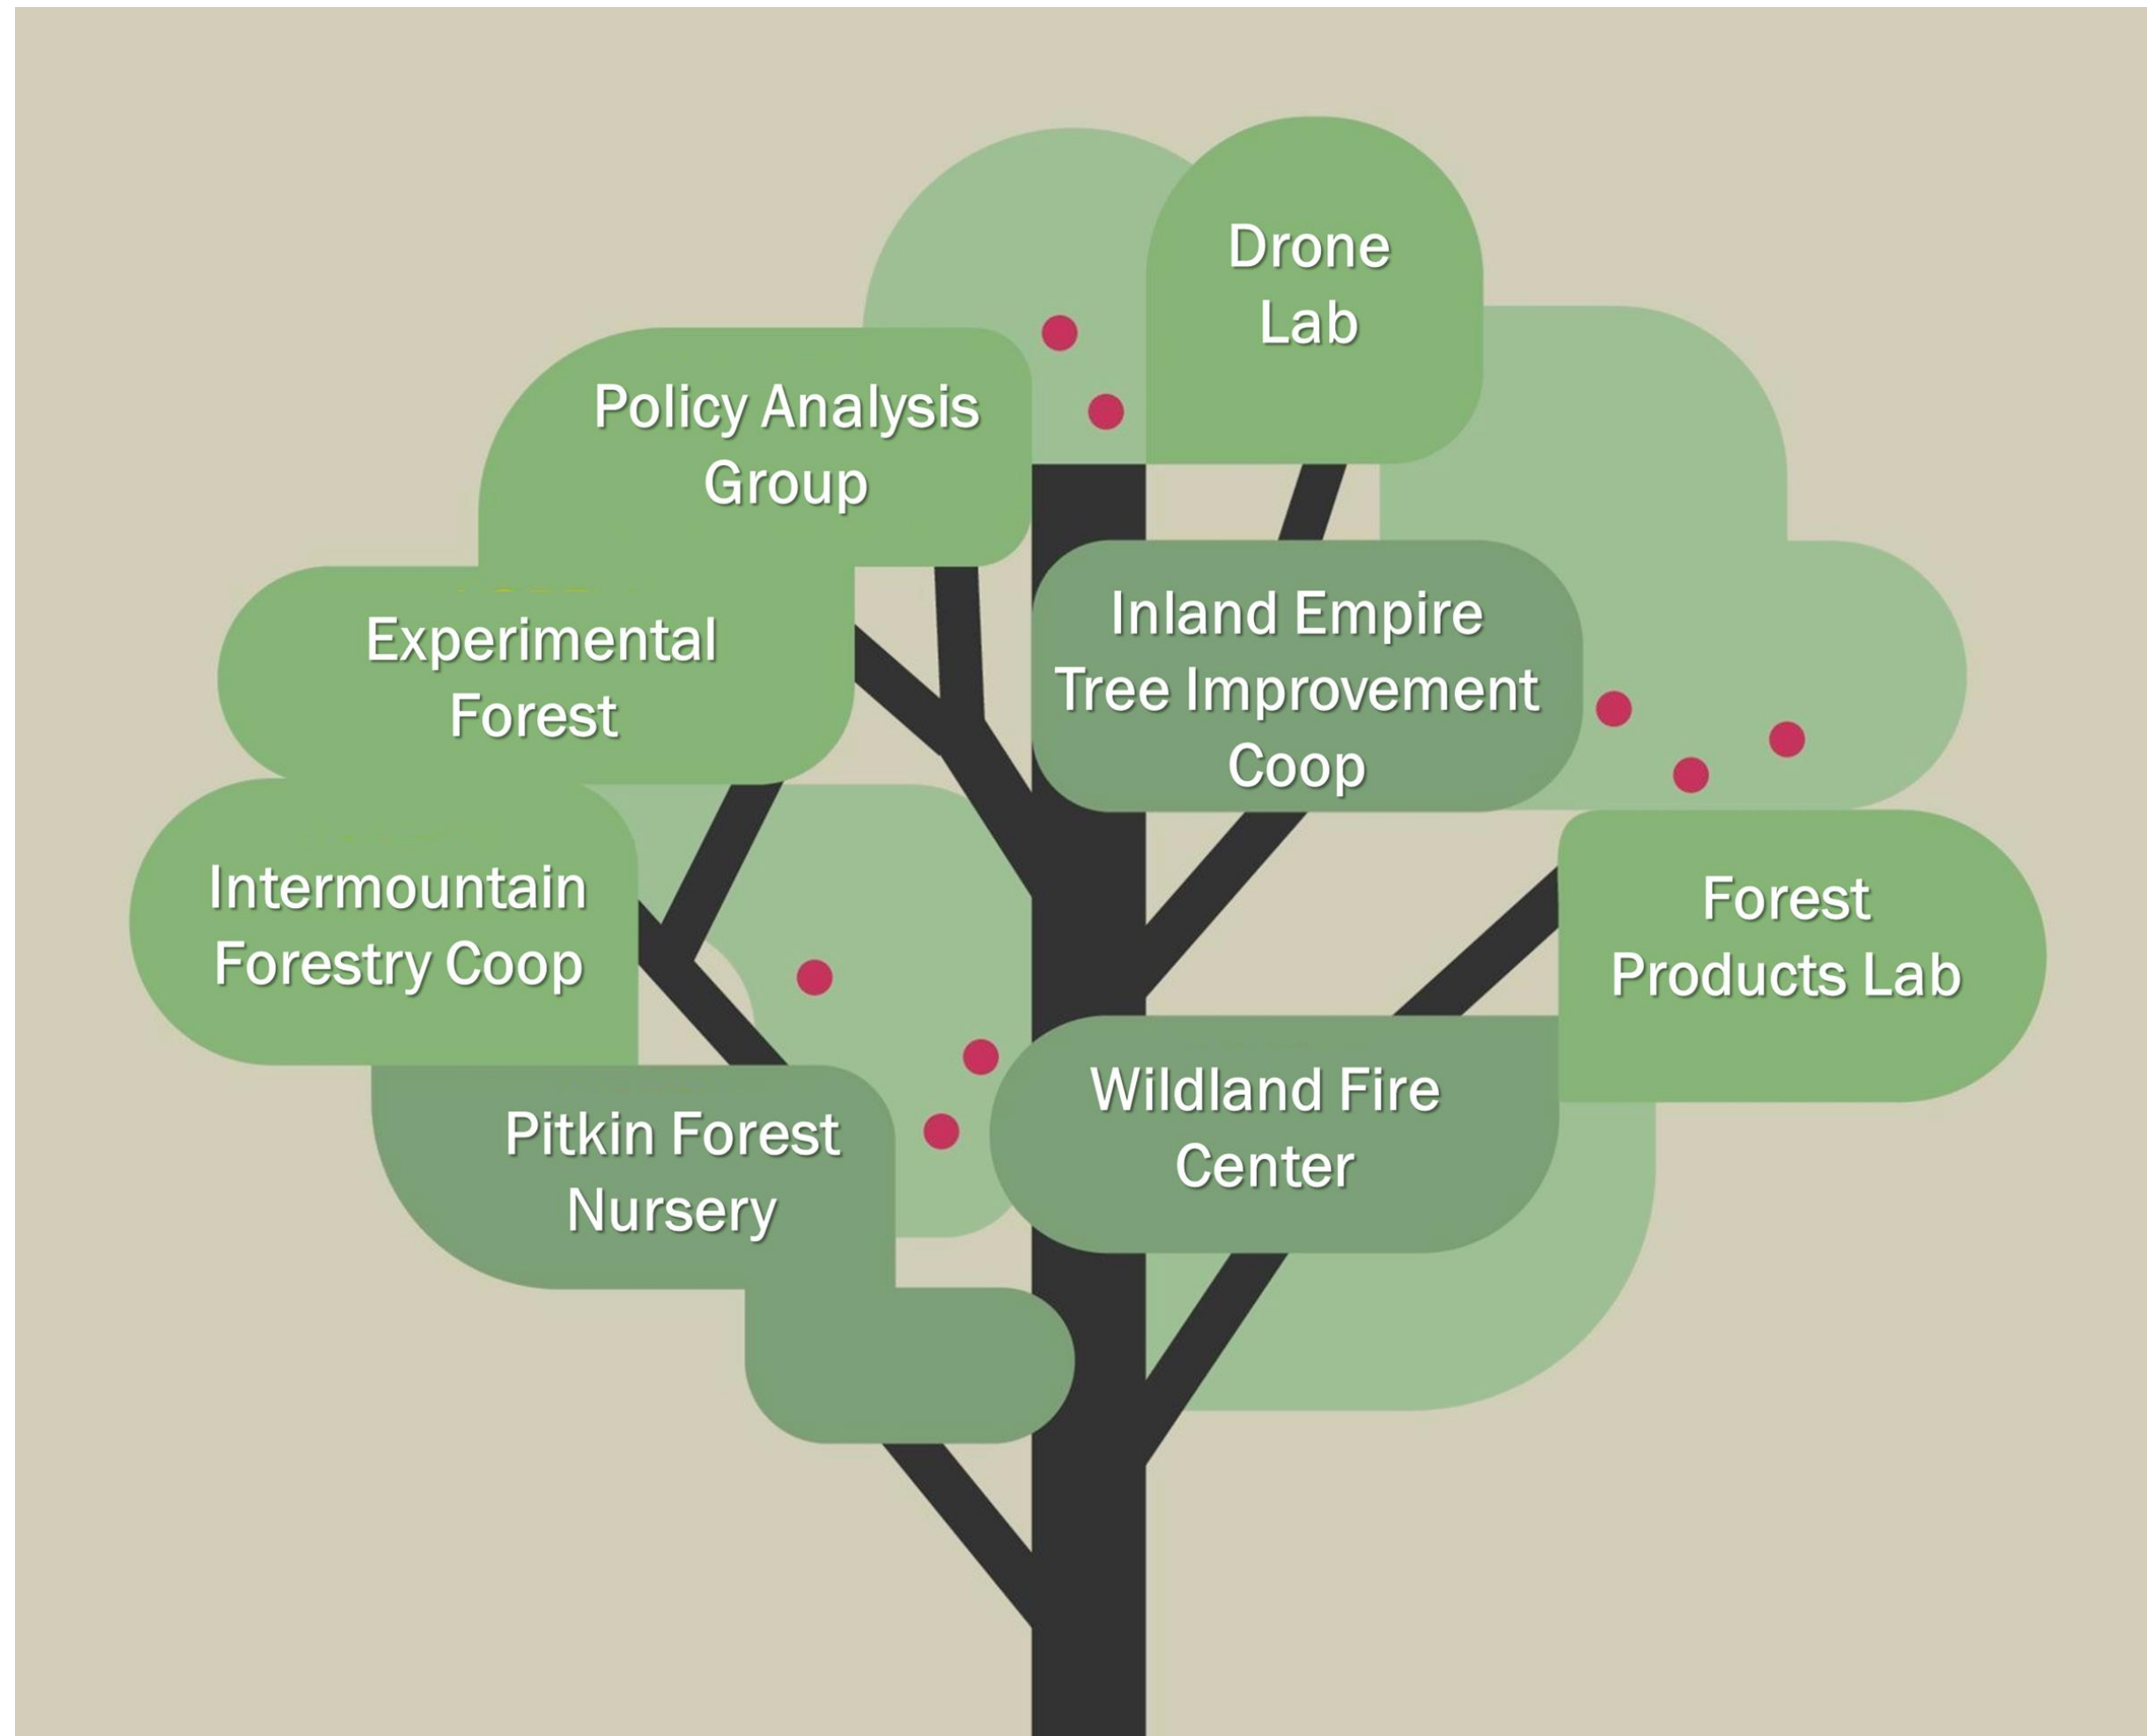

FUTURE DIRECTIONS @ UI

FOREST INNOVATIONS INSTITUTE

**SYNERGIES & COLLABORATIONS
FOSTERED THROUGH CAFS**

FOREST INNOVATIONS INSTITUTE

LEVERAGING RESOURCES, CUTTING BARRIERS

Fixed-rate contracting

Coordinated and individual projects

Shared and proprietary R&D

Discounted membership for existing coops

Not intended for commercial services

A stylized tree graphic on the left side of the slide, with a black trunk and branches, and foliage in shades of red, orange, and yellow.

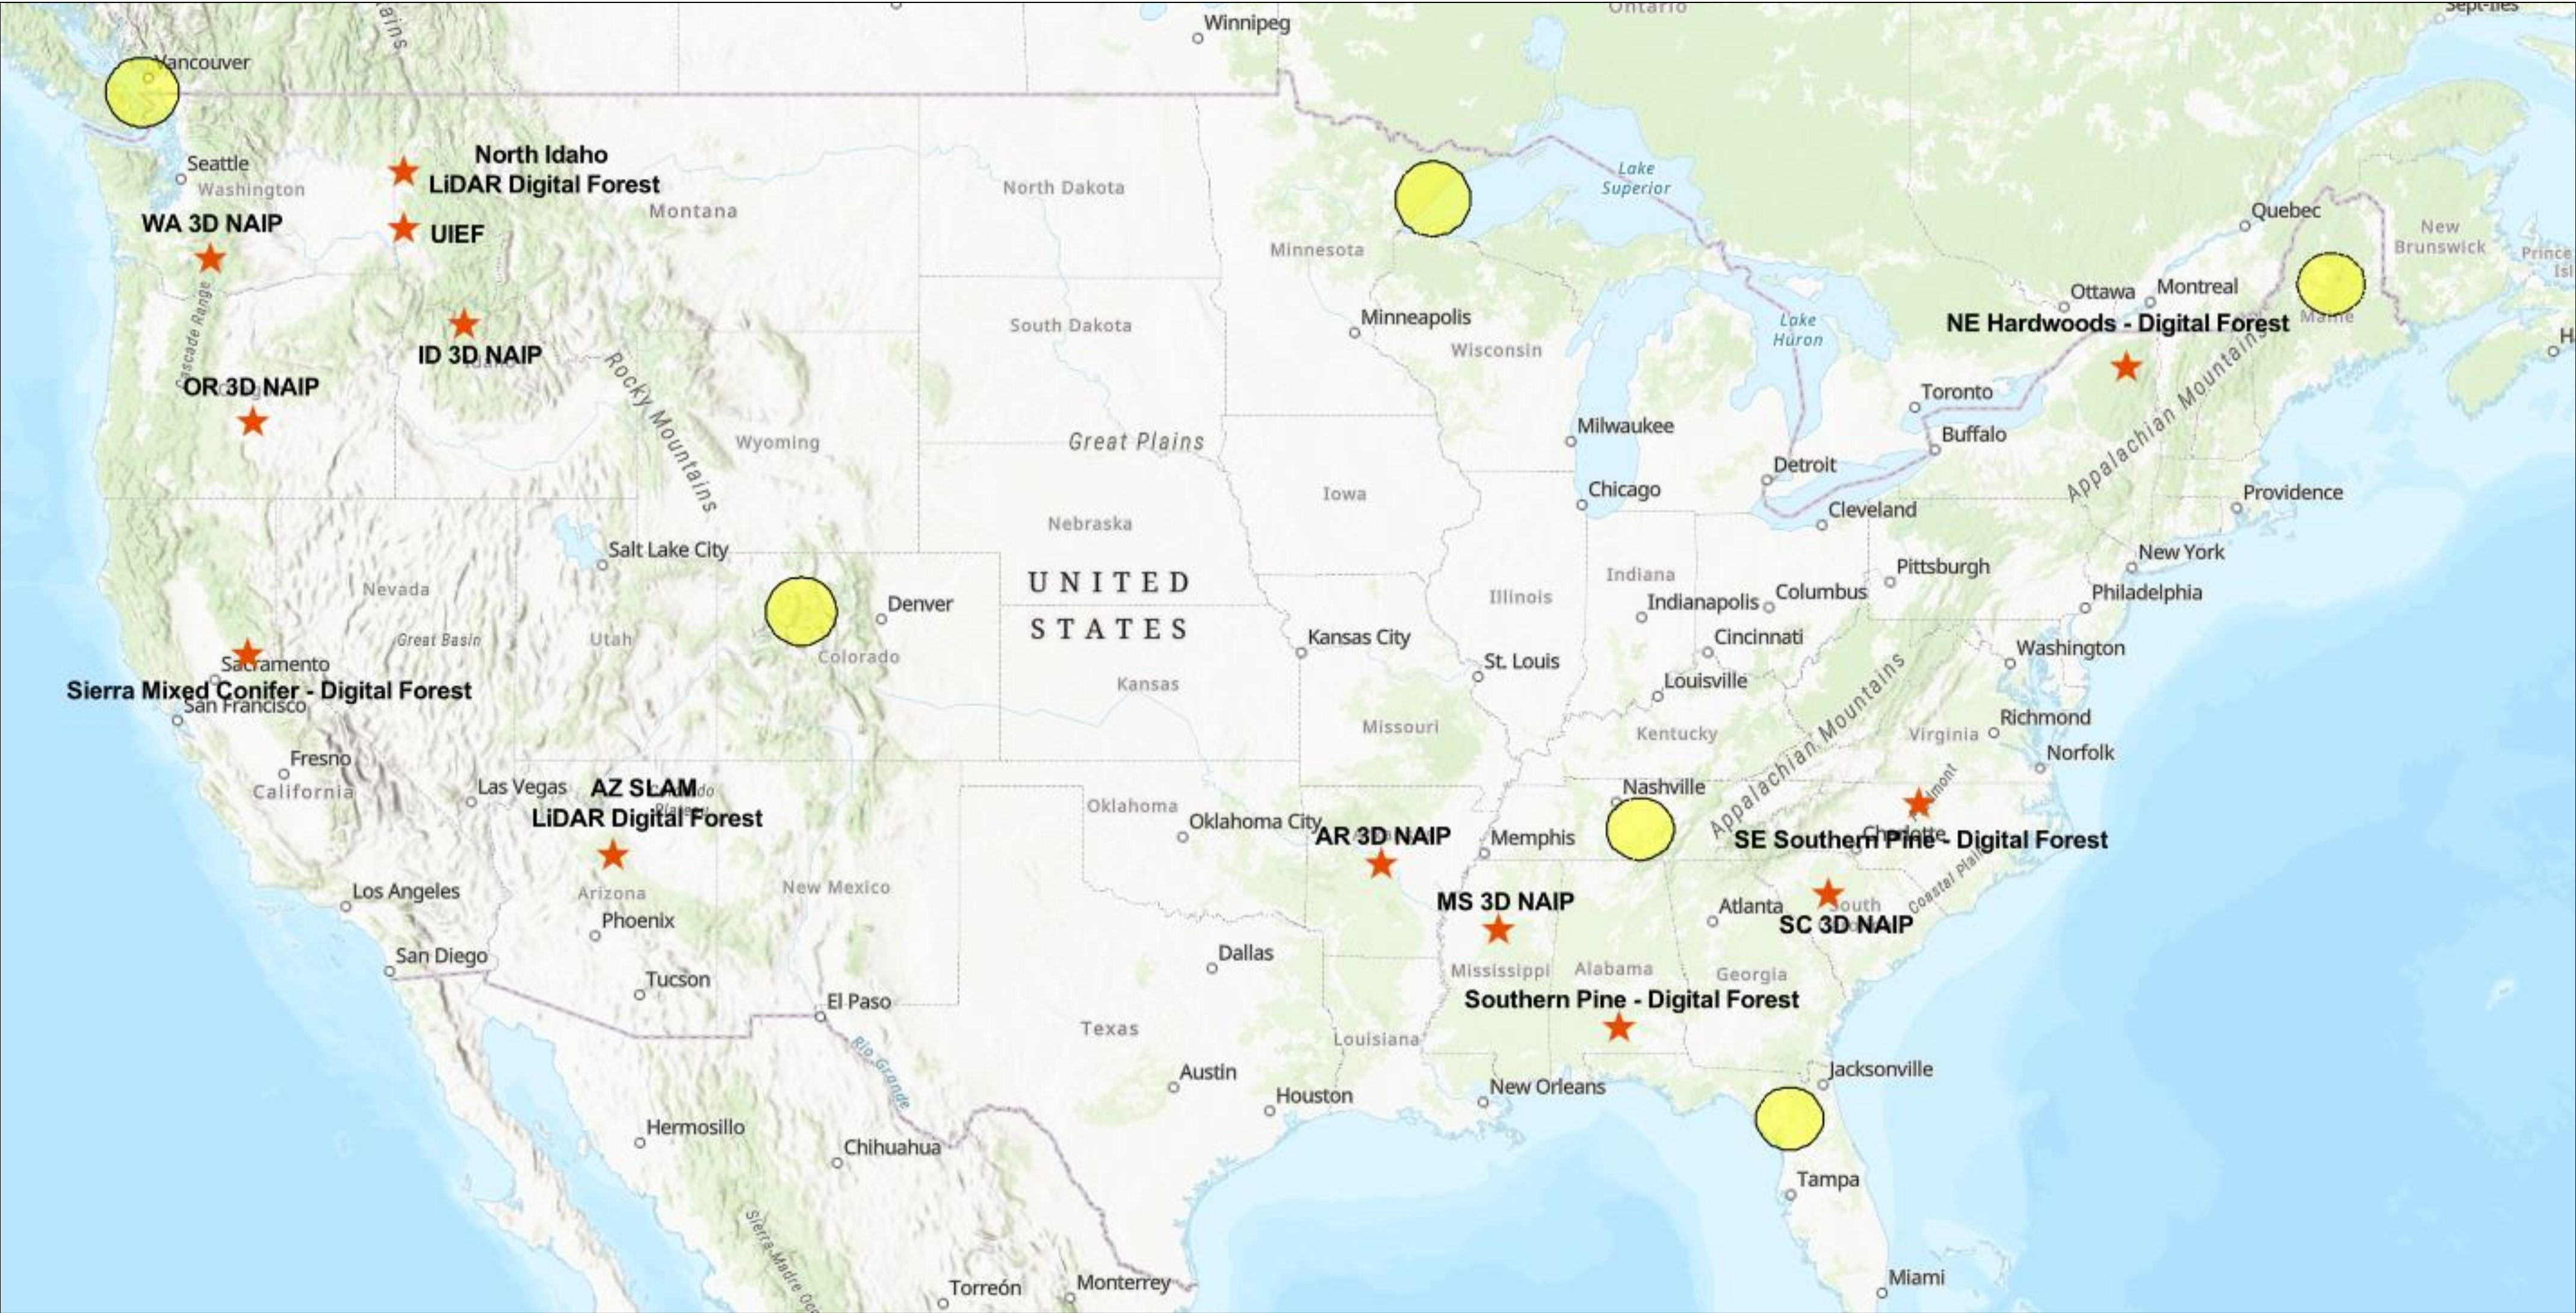

FOREST INNOVATIONS INSTITUTE

CORE MISSION

- I** Advance contemporary and emerging technologies and information systems
- I** Crosscutting research: digital transformation, networking, robotics, automation, remote sensing, AI
- I** Partner with University faculty and students for interdisciplinary training and research – workforce development
- I** Engage industry specialists, businesses, Native American Tribes, nonprofits, universities, and public land management agencies

FOREST INNOVATIONS INSTITUTE

REGIONAL & NATIONAL IN SCOPE & COLLABORATION

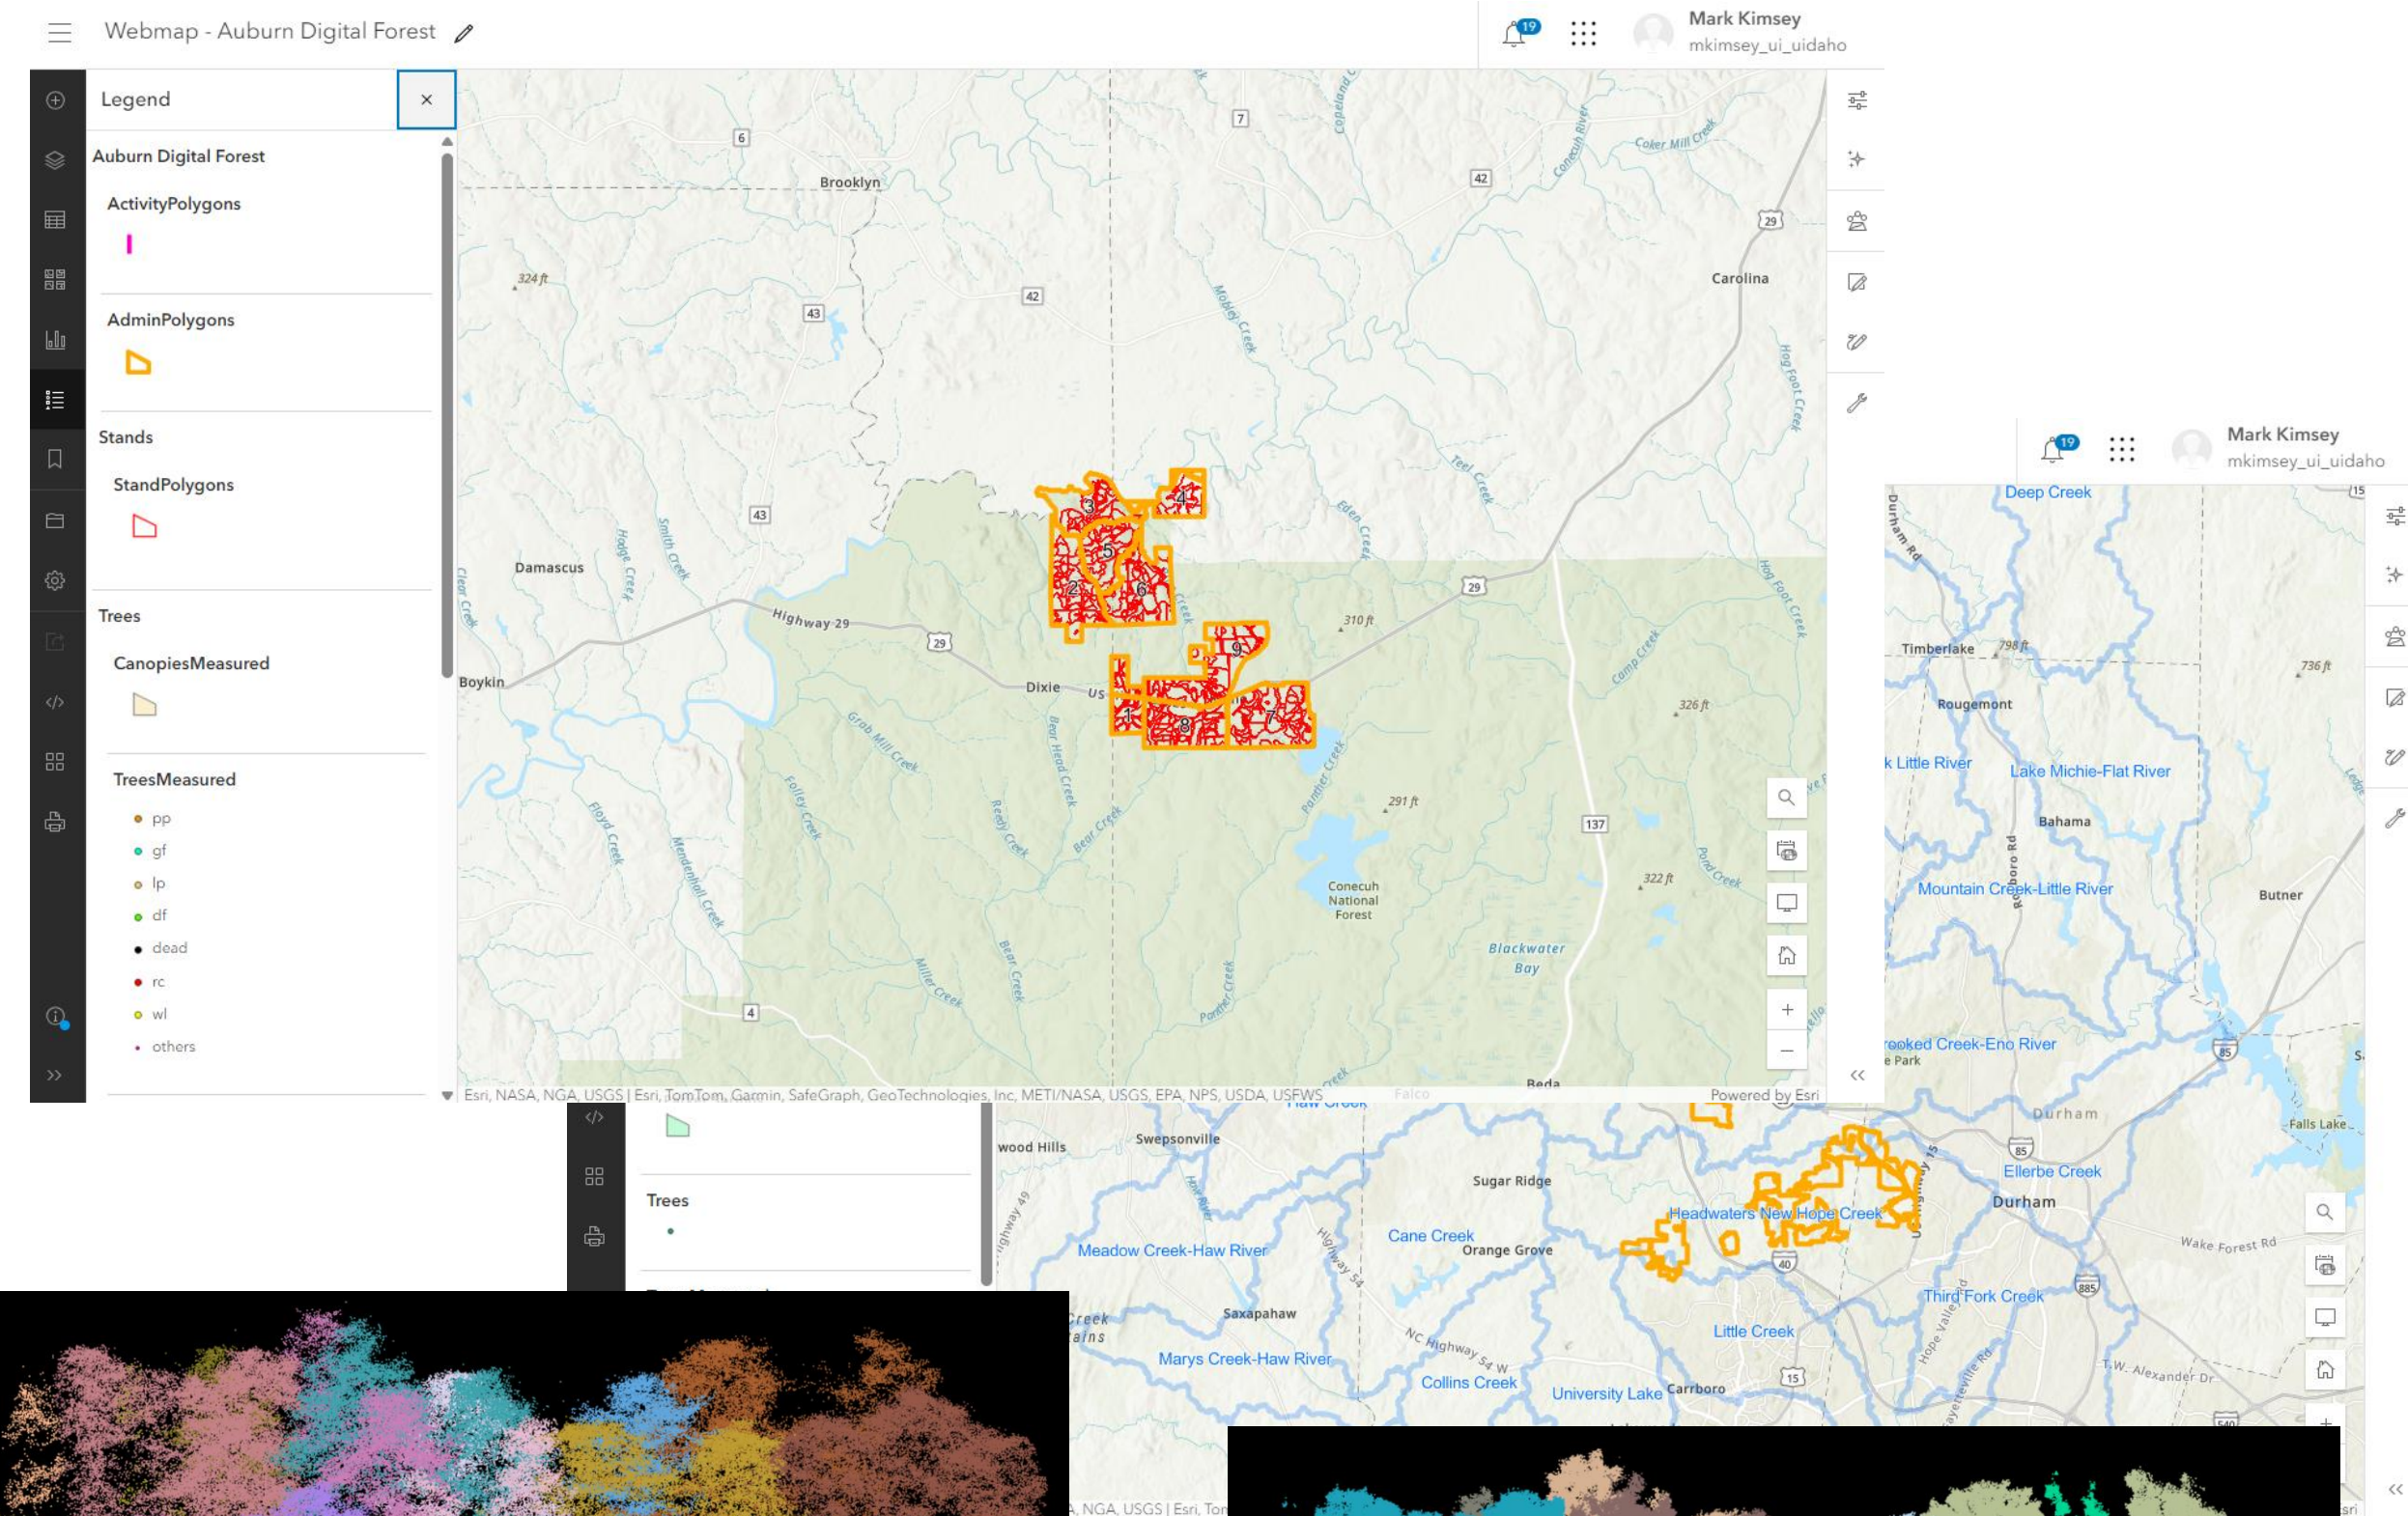

NATIONAL INITIATIVE

DEVELOP A COORDINATED INNOVATION NETWORK TO LINK RESEARCH FORESTS NATIONWIDE

PAUL SMITHS COLLEGE, AUBURN, DUKE, UC BERKELEY, OREGON STATE
...OTHERS

- Drive digital forest innovation
- Broad geographic networking
- Diverse forested communities for testing
- Deploy a common data model to all partners and develop common analytics
- Develop Next Generation Research and Management Personnel
- Leverage Research and Resources for Competitive Grant Funding
- Build International Relationships
